GH 03 installation plan

[SAMPLE] Fictional Aurora Labs company record. Not research findings.

Record	PLAN-GH03-03
Date	2026-09-15
Owner	Marcus Webb
Project	Aurora Labs / GH-03

Context

Install six active Nova Widget v2 sensors at Lindenhof Pilot site GH-03. Keep six additional sensors as replacements. Two gateways arrive in the delivery, but only GW1-001 is initially active.

Details

Label plant positions P01 through P06. Pair the sensors with GW1-001 and retain the local export. Record moisture as volumetric percent and temperature in degrees Celsius. Do not infer crop outcomes from these fictional measurements.

Next action

Photograph the installation and associate each observation with its sensor serial. Attach DN-2026-041 to the receiving record and report failed pairing to Marcus Webb.
